

Adecco Átrium Park, Millenáris Park

Two offices for the price of one.

Client Objectives

Adecco had 2 more years on their lease when we started working with them. The objectives were straightforward: renew the office and the working environment, and integrate the office located in Buda with the head office in Pest.

Results

After running a tender process for the suitable offices available on the market we successfully renegotiated the lease terms in the existing office, achieving a rent reduction and whole office space renovation on the landlord cost. We redesigned and modernized the head office in Pest. Helped optimize the working environment and the HVAC, improved community and recreational areas, and reduced the noise level of the office. In the head office building the retail unit was redesigned on the ground floor that used to function as a bathroom showroom and was turned into a new recruitment center. VLK Cresa technical project management team made sure that planning and construction works were delivered on time and fitted in the budget.

ADECCO is the world's largest firm offering human resources services. It has 31.000 permanent employees in 5.100 offices in more than 60 countries serving more than 100.000 clients, and 650.000 temporary workers working for its clients. It has been present in Hungary since 1991.
