

Ekonobag Tatabánya

Good quality industrial site, and right size unit.

Client Objectives

EkonoBag contacted us as they were looking for a larger industrial manufacturing spaces where they could expand their service line more.

Cost efficient, good quality industrial site in Tatabánya that could accommodate their factory. Our relationship started 10 years ago and we have been supporting them since wherever they needed our help.

Results

We have searched and looked at every available option however the lack of industrial supply created a challenging task to fulfil. Eventually we found an old warehouse building that was the right size and in the right location, that could be converted into a manufacturing building. After several negotiations we managed to sign the lease agreement with the landlord who also agreed to turn the building into a category "A" industrial manufacturing building, within a record time of 4,5 months.

The Ekonobag Kft has been established in the city of Tatabánya - near Budapest. The factory is equipped with modern machinery installed in 2011.
